About the HPA Centre for Radiation, Chemical and Environmental Hazards (CRCE)

CRCE carries out HPA's work on ionising and non-ionising radiations. It undertakes research into protection from the risks of these radiations, provides laboratory and technical services, runs training courses, provides expert information and has a significant advisory role in the UK.

On 26 July 2010 the government published the report of the Department of Health's review of arm's length bodies. This stated that the HPA will change its status from a non-departmental public body to an executive agency. The existing functions of the HPA will be transferred to a new public health service, Public Health England, on 1 April 2013.

The HPA is committed to providing customers with a full range of high quality radiation protection services through this period of change and into the future.

Programme

08.30 – 09.00 Registration and Coffee

Introduction

What is Optical Radiation?

Trivial Sources
Hazardous Sources
Uncertain Sources

Biological Effects and Exposure Limits

Quantities and Units

Legislation, Standards and Guidance

Avoiding Hazardous Exposures

Aesthetic Lasers and Intense Pulsed Lights (IPL)

Applications and Safety Issues
Available Guidance
Practical Inspection

Sunbeds and Solaria

Applications and Safety Issues
Requirements of the Act
Practical Inspection

Laser Shows and Effect Lighting

Applications and Safety Issues
Available Guidance
Practical Inspection

Other Lamps, Lights and Lasers

Discussion and Sources of Further Information

16.30 Close

Delegates

This course is designed for Environmental Health and Safety Regulators who are involved in the regulation and inspection of aesthetic lasers, sunbeds and light shows.

The use of aesthetic lasers and intense pulsed lights for cosmetic treatments became exempt from regulation with the Care Quality Commission, in England, in 2010. The responsibility for the regulation of this sector in England falls to local authorities. Some local authorities can regulate these activities using existing local registration and licensing regimes.

This course will review the main applications and safety issues and will give a sound basis for the inspection of such practices. The guidance of the Medicines and Healthcare products Regulatory Agency (MHRA) will be covered.

The use of sunbeds has been regulated in England since April 2011. The underlying health issues and requirements of the Act will be discussed.

Lasers and powerful lamps and lights are also used at public entertainment venues. Again, the main applications will be discussed along with the safety issues. The practicalities of assessments and inspections, with reference to HSE guidance, will be covered.

The course will conclude with a delegate driven review of other laser and light applications and discussion on sources of further information.

Fee

£275 per delegate. Morning and afternoon refreshments and a buffet lunch will be included.

Presenters

The presenters will be staff from CRCE, all of whom are specialists in the topics covered by the course.

Enquiries

Administration and booking enquiries should be made to the Training Administrator, Leeds.

Tel +44 (0) 113 267 9041
Fax +44 (0) 113 261 3190
Email anne.cann@hpa.org.uk

Technical enquiries should be made to the Course Manager, Adam Lowe.

Tel +44 (0) 113 267 9041
Fax +44 (0) 113 261 3190
Email adam.lowe@hpa.org.uk

Control of Aesthetic Lasers, Sunbeds and Light Shows

24 April 2013

CRCE, Leeds

The quickest and easiest way to book is online at:

www.hpa-radiationservices.org.uk/nir

Alternatively, complete this form and send it to the address overleaf

- I enclose a cheque for £275 (payable to the 'Health Protection Agency') (please write Course Reference No. on reverse of cheque)
- I have paid by credit card
- I will pay by BACS (please contact the Training Administrator)
