

UK HSA Chromosome Dosimetry Service - Questionnaire for biological dosimetry enquiry

Please answer the following questions and return the details with the blood sample(s).

- Patient name and date of birth

- Name of Company where suspected exposure occurred

- Please provide a short description of the incident including:
 - How long ago did the overexposure occur?
 - What type of radiation?
 - How far away was the individual from the source?
 - Over how long was the exposure?
 - Was the exposure continuous or intermittent?
 - Were one or more personal dosimeters being worn? If yes what dose(s) was(were) recorded?
 - Was it a partial body or whole-body exposure?
 - Was it an external or internal exposure?

- Information concerning confounding factors eg. past radiotherapy treatment

- Name and address of doctor to report results

- Do the Ionising Radiation Regulations 2017 (IRR17) apply? If so, have you contacted the appropriate HSE representative?
