

Printing the *Medical imaging. What you need to know* A5 leaflet

This pdf is not set up to be read on a computer, it is designed to be printed and read as a paper document.

To produce a leaflet:

- The document should be printed on two double sided A4 sheets.
- The first sheet should be backed onto the second sheet
- The third sheet should be backed onto the fourth sheet

IMPORTANT

PDF print settings need to be:

- Actual size (not shrink to fit)
 - Print on both sides of paper
 - Flip on short edge
-
- Fold the sheets in half along the dotted line
 - Put one inside the other so that the page numbers are in order
 - Use a long arm stapler to fix the sheets together in the middle of the centre line
