Statement on future of PACE in ArcGIS Desktop/ArcMap®

UKHSA RCCE Radiation Assessments Department, 19/01/2026

PACE is currently implemented as an add-in to ArcGIS desktop (also known as ArcMap), with a similar implementation in ArcGIS Pro.

ESRI have stated that ArcGIS 10.8 will be the last major release of ArcGIS Desktop/ArcMap, and that the current version (10.8.2) will continue to be supported to until 1/3/2026. ESRI is encouraging all users to migrate to ArcGIS Pro. Further information can be found here:

<https://support.esri.com/en-us/knowledge-base/arcmap-continued-support-000029721>

The current release of PACE is version 4.1 in both Desktop and Pro. No further releases of PACE for ArcGIS Desktop are planned. Sale of PACE 4.1 for Desktop to new customers has now ceased.

Support for existing customers who have choose not to upgrade to ArcGIS Pro, but who still have remaining hours of support from the original purchase, will be honoured on a best endeavours basis until summer 2027.
